Specialist on Plastic Free Packaging

AQUEOUS COATING

PFAS FREE

PLASTIC FREE

RECYCLABLE

HOME COMPOSTABLE

COMPANY PROFILE

The paper products we can do including single wall /double wall paper cup,ripple paper cup, triple wall double base cup (we have a patent for this cup), soup containers, ice cream cups, ripple paper bowls, window food boxes, food trays, and so on , The plastic products we can do including ps coffee cups lids, pp bowl lids, customer logo lids with cheap mold cost, and acceptable MOQ.

Under worldwide baning plastic policies influence recently, we launched out the whole serial paper package items with aqueous coating plastic-free technology,including aqueous coating plastic-free ripple and double wall paper cups, paper lid,paper trays, paper box, and ripple paper bowls. and CPLA coffee cup lids and bowl lids and PLA straw.

We provide competitive prices, constant performance, leading technology, and innovative solution on disposal food package products.

AQUEOUS COATING

What is Aqueous Coating?

The aqueous coating is a form of barrier that is applied through a water-based dispersion of heat-seal adhesive onto paperboard, which greatly reduces the plastic percentage compared with traditional PE/PP/PLA coating or lamination.

Grease-proof Aqueous Coating

Our paper with grease-proof aqueous coating provides true grease resistance, prevents oily or other high permeable contents from passing through packaging containers.

- ✓ RECYCLABLE
- ✓ REPULPABLE
- ✓ COMPOSTABLE
- ✓ BIODEGRADABLE

Application

Different food applications and using conditions are available, such as salad, soup, French fries, noodles, fried chicken, etc.

1. Paper Cup
2. Soup Container
3. Salad Bowl
4. Lunch Box
5. Food Tray
6. Burger Box

Environmental

Applied in recyclable material with aqueous coating, in line with current plastic-ban/plastic-reduction trend, best replacement and solutions of plastic containers and plastic coating containers.

Stable Supply

Stable supply from coating to paper material, besides, we have our own dispersion machines and middle-speed, high-speed forming machines etc which can ensure the capacity from raw material to finished products.
